SHUTING **TANG**

Full-Stack Developer

Montreal, QC | 438-351-2307 | tangst816@gmail.com

LinkedIn/shuting-tang | github.com/SusieTang0 | shutingtang.vercel.app

Full-Stack Developer with hands-on experience building web applications using React, TypeScript, Java, Spring Boot, Python, and Node.js, with experience in REST APIs, databases, and real-time web applications.

SKILLS

Frontend: React, TypeScript, JavaScript, C#, HTML5, CSS3, Carbon Design System, Vite, Tailwind CSS
Backend: Node.js, Python, Django, ASP.NET Core, Java, Spring Boot, REST APIs
Database: PostgreSQL, Supabase, MySQL, MongoDB, SQLite
Tools: Git, GitHub, Bitbucket, JIRA, Trello, Docker, Figma, Miro, Claude Code

EXPERIENCE

Full-Stack Developer Intern | R&D Department | YULCOM Technologies

Montreal, QC | Feb – May 2025

- Contributed to building a **modern healthcare platform** based on a traditional hospital care system, with integrated **AI features** for analysis and diagnostic assistance.
- Developed **9 healthcare application pages** using **React**, **TypeScript**, and **Carbon Design System**, contributing **15+ reusable UI components** and custom React hooks.
- Integrated **REST APIs** and **Cloudinary** for data and image management.
- Assisted with **Django/Python** and **PostgreSQL** development, testing, debugging, and **Docker-based** local development.
- Collaborated with frontend/backend developers using **JIRA** and **Bitbucket**.

PERSONAL PROJECTS

Smith Clinic Booking & Appointment Management System

- Designed and developed the **booking website** using **JavaScript, Node.js, Express.js, Bootstrap, and MongoDB**, implementing user registration, profiles, appointment booking, and feedback functionality.
- Developed the **appointment management system** using **React, TypeScript, Java, Spring Boot, and MySQL**, including RESTful APIs and **CRUD** operations.
- Collaborated with team members using **GitHub** for version control and code collaboration, and managed project tasks with **Trello** using an **Agile** workflow.

Order & Delivery System

- Developed modern web interfaces using **Blazor**, **MudBlazor**, **C#**, and **ASP.NET Core**, with dynamic data updates and synchronization.
- Implemented real-time location tracking and display using **Google Maps API** and **SignalR** for location data transmission and map visualization.
- Used **SQLite** for lightweight data storage and **Microsoft Azure** for deployment; managed development tasks with **Trello** using an Agile workflow.

EDUCATION

Full Stack Developer Program | John Abbott College
Montreal, QC, Canada | Oct 2023 – June 2025

Bachelor of Arts (B.A.) in Business Administration | Nanjing Agricultural University
Nanjing, Jiangsu, China

CERTIFICATES

AI Training & Project Completion | AI Launch Lab | April 2025
